4-Out 1-In Flow Offense

Offensive Spacing Principles
4 Out 1 In

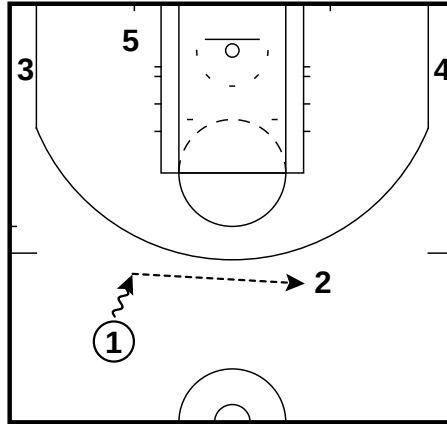

For offensive spacing purposes, the team tries to stay within the designated blue box areas on the court.

Player positioning is interchangeable, but the players must fill the following spots on the court:

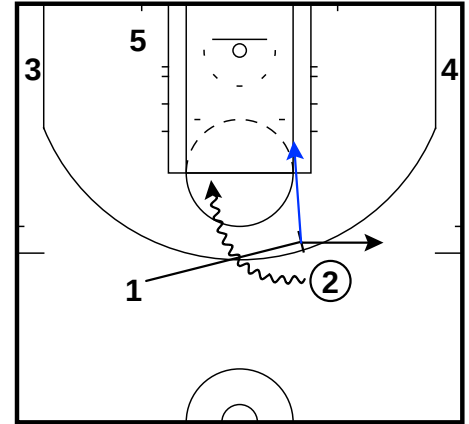

- 2 slot players outside the lane line extended.
- 2 corner players, below the break but high enough that they can drive baseline on a catch.
- 1 dunker spot player that can run short corner to short corner.

Slot -> Slot Entries
4 Out 1 In

These entries begin with the ball handler dribbling up to fill one slot area and passing to the opposite slot

Slot -> Slot: Follow P&R
4 Out 1 In

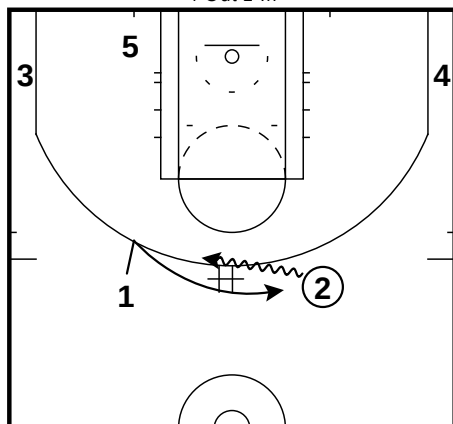

1 follows pass to opposite slot running in front of the receiver to set a ball screen. They can roll or pop after setting the screen.

If x5 helps on a drive/tag, 5 looks to seal x3 in front or behind them to make kickout read easier for dump off or pass out to corner 3.

2022-23 Lakers Playbook

4-Out 1-In Flow Offense

Slot -> Slot: Follow DHO
4 Out 1 In

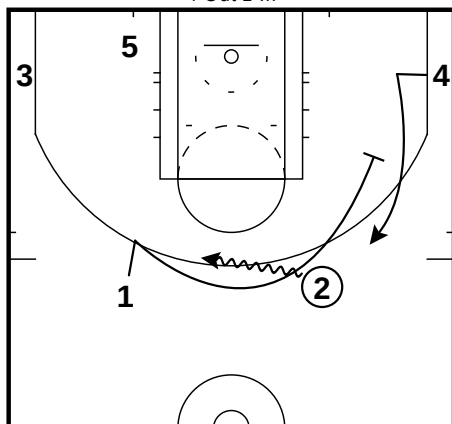

1 follows pass to opposite slot running behind the receiver to receive a dribble handoff or flip.

They can then drive (vs over coverage), shoot (vs an under), hit the screener (vs hedge), or flip into a ball screen with the handoff player.

If x5 helps on a drive/tag, 5 looks to seal x3 in front or behind them to make kickout read easier for dump off or pass out to corner 3.

Slot -> Slot: Follow DHO Overplay Pin
4 Out 1 In

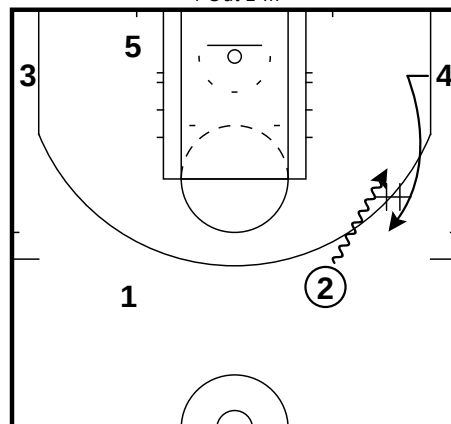

1 follows pass to opposite slot running behind the receiver to attempt to receive a dribble handoff or flip.

If this is overplayed and the handoff can not take place, 1 continues their path into a pin down screen for the corner player.

The ball handler can drive or pass to 4, who can shoot, drive, or flow into another slot -> slot entry option.

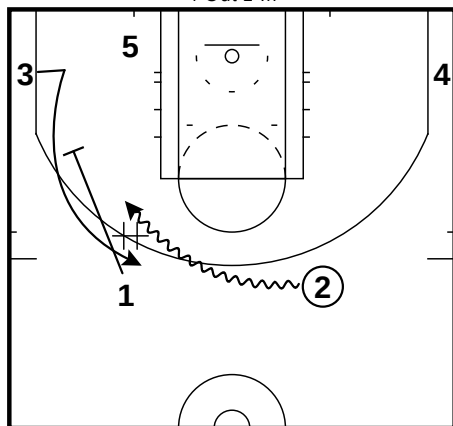

Slot -> Slot: Corner DHO
4 Out 1 In

The ball handler drives at the corner player, who runs up to receive a dribble handoff or dribble pitch.

That player can drive, shoot, or flow into another motion option.

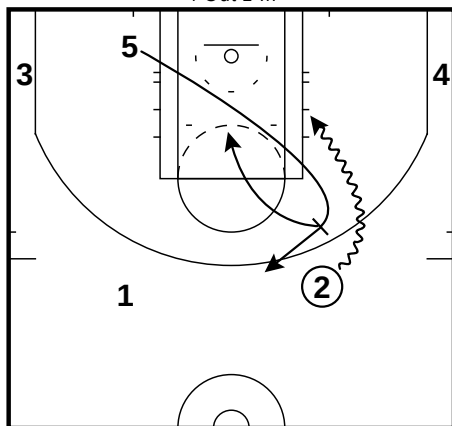

Slot -> Slot: Screen Chicago Away
4 Out 1 In

1 down screens away from their pass for the corner player, who then receives a handoff/flip/dribble pitch from the ball handler.

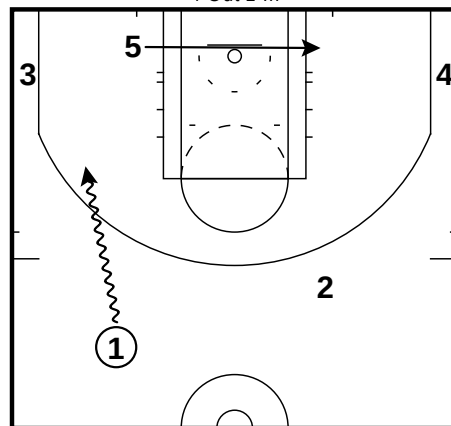

The corner player can drive, shoot, or dribble to fill the open slot to reset.

Slot -> Slot: Step-Up P&R
4 Out 1 In

5 sprints up into a ball screen for the ball handler. The screener can roll/pop.

Slot Dribble at Corner Entries
4 Out 1 In

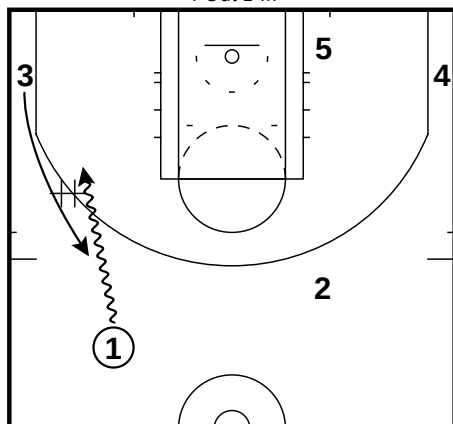

These entries begin with the ball handler dribbling towards the player in the strong side corner.

5 clears to the weak side dunker spot.

2022-23 Lakers Playbook

4-Out 1-In Flow Offense

Dribble at Corner: DHO
4 Out 1 In

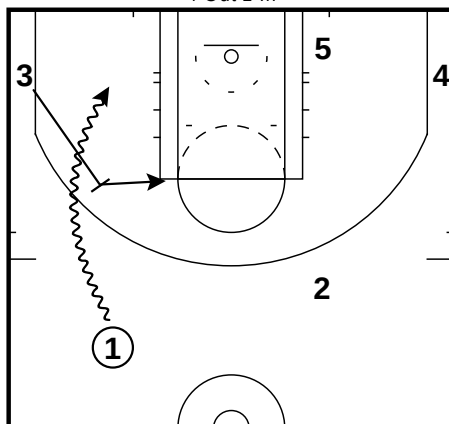

3 runs behind the driving ball handler to receive a handoff

Options:

1. Shoot (vs under)
2. Drive (vs over w/o hedge)
3. Pocket pass to roller (vs over w/hedge)
4. Initial ball handler keeps and drives baseline
5. Flip into ball screen
6. Reset offense

Dribble at Corner: Step-Up P&R
4 Out 1 In

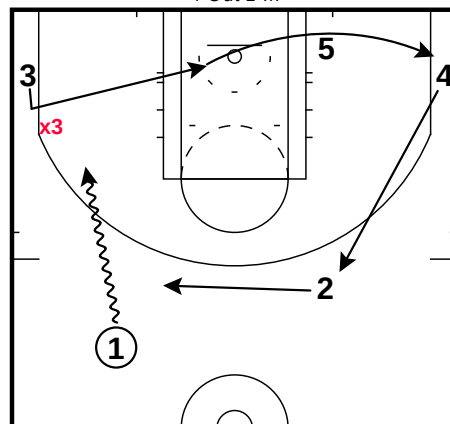

3 runs in front of the driving ball handler to set a step-up ball screen.

After setting the screen, the screener can roll/pop.

If x5 helps on a drive/tag, 5 looks to seal x4 in front or behind them to make kickout read easier for dump off or pass out to corner 4.

The ball handler will read the defense and either look to score on a drive, hit the screener on a pop/roll, or dump off to the dunker, or skip pass to 4.

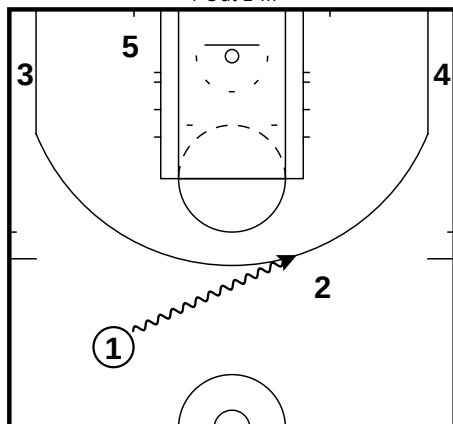

Dribble at Corner: Blind Pig
4 Out 1 In

If the corner player is overplayed, they cut back door.

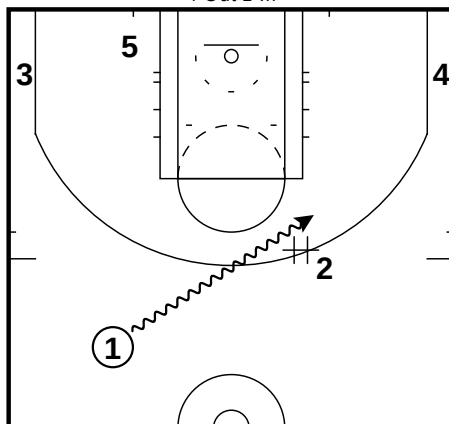

If the cutter isn't available, 1 continues dribbling towards the corner and other perimeter players rotate to fill open spots. The ball handler can reset with a pass to the slot.

Slot Dribble at Slot Entries
4 Out 1 In

These entries begin with the ball handler dribbling up to fill one slot area and dribbling towards the opposite slot

Dribble at Slot: DHO

The ball handler drives in front of the opposite slot to execute a dribble handoff.

Options:

1. Shoot (vs under)
2. Drive (vs over w/o hedge)
3. Pocket pass to roller (vs over w/hedge)
4. Initial ball handler keeps and drives
5. Flip into ball screen

2022-23 Lakers Playbook

4-Out 1-In Flow Offense

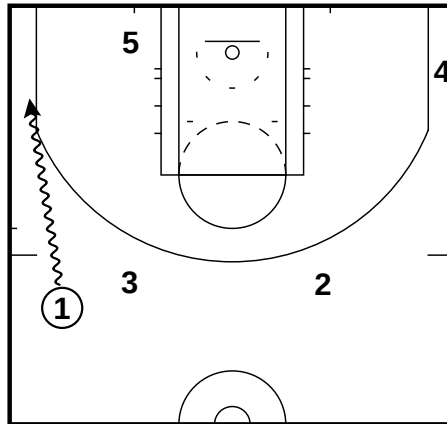

Dribble at Slot: Pin Down
4 Out 1 In

The ball handler drives at the opposite slot and that player screens away to set a pin down screen.

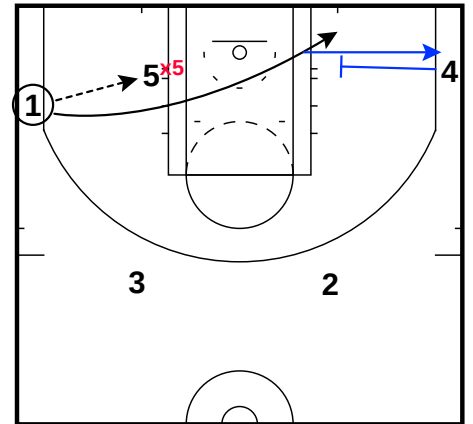

This can flow into a pass for a shot/drive, a handoff (Chicago/Zoom action), a pass into a ball screen, or a pass to a reset.

Corner Entries
4 Out 1 In

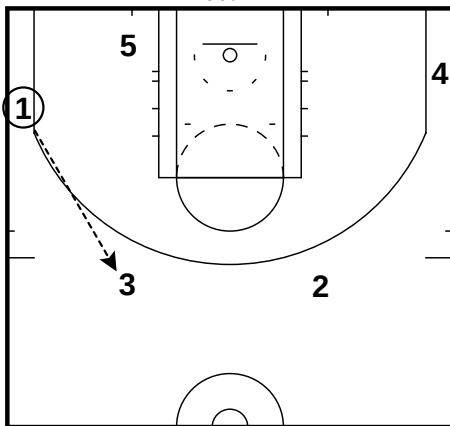

These entries begin with the ball handler dribbling up to fill the strong side corner OR the ball being passed from the slot to the corner to initiate the offense.

Corner -> Post Entry
4 Out 1 In

On a pass to the post, the initial ball handler will clear to the opposite dunker spot or corner (potentially off an exit screen).

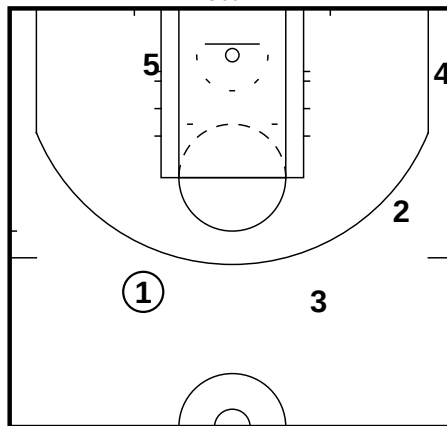

Corner -> Wing
4 Out 1 In

On a pass from the corner to the wing, options are:

1. The opposite slot sets a ball screen
2. The receiver passes to the corner/slot or drives at the corner/slot to initiate another flow option

Unbalanced Entries
4 Out 1 In

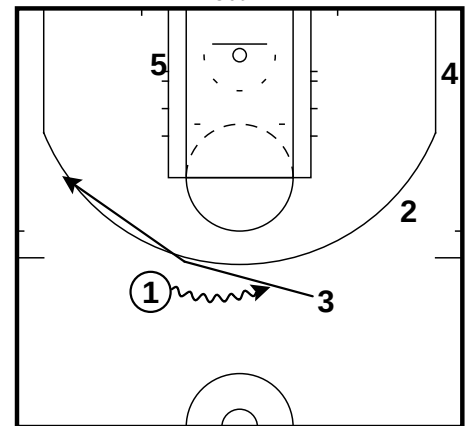

The offense can also be initiated from an unbalanced look, with an extra perimeter player on the weak side.

The dunker spot player can be on either end of the court.

The ball handler can dribble into a perimeter/post isolation, or can initiate the offense in the following ways.

Unbalanced: Ghost
4 Out 1 In

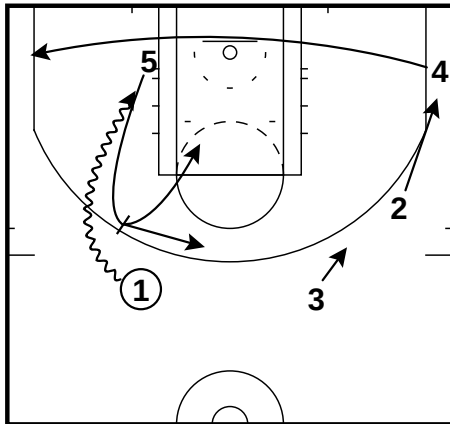

3 sets a ghost screen for the ball handler, popping towards the open wing.

1 looks to drive or pass to 3, who can shoot, attack, or the offense can flow into more options.

2022-23 Lakers Playbook

The ball is reversed to the opposite slot.

The ball handler dribbles towards the wing, triggering a back cut from the overloaded side. The corner player lifts up to receive the ball.

Unbalanced: Swing (2/2)
4 Out 1 In

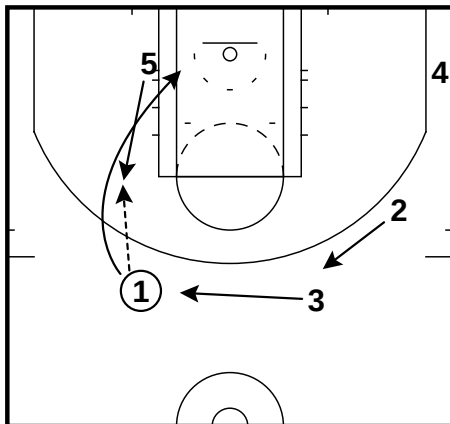

The ball is passed to the new wing player.

The receiver can look to attack baseline or flow into a handoff or ball screen with the passer.

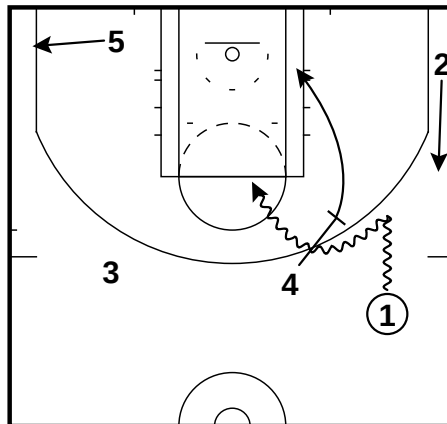

The cutter runs off an exit screen weak side (or just clears to the opposite corner).

Unbalanced: Elbow
4 Out 1 In

5 lifts to just outside the high post for an entry. 1 then cuts to the rim, and the other perimeter players rotate behind him to keep spacing.

Unbalanced: Shake
4 Out 1 In

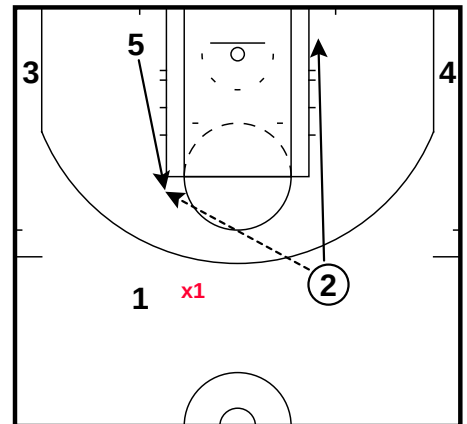

1 initiates the offense on the overloaded side, and receives a ball screen from 4.

The strong side corner lifts to the wing as the screener rolls.

5 at the opposite dunker may space himself out to the corner.

Pressure Release: Dunker Lift (1/2)
4 Out 1 In

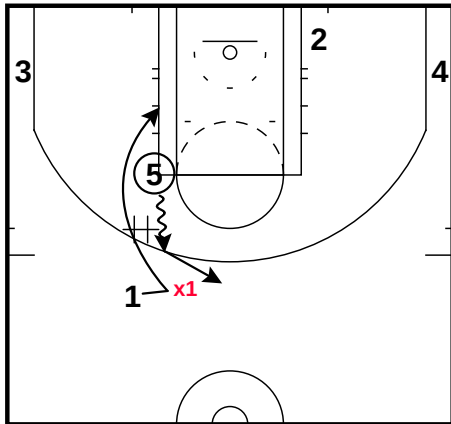

If the slot -> slot swing pass is overplayed, the dunker player lifts to the elbow for a high post entry.
