

# Motion Zone Offense

Coach K – Duke

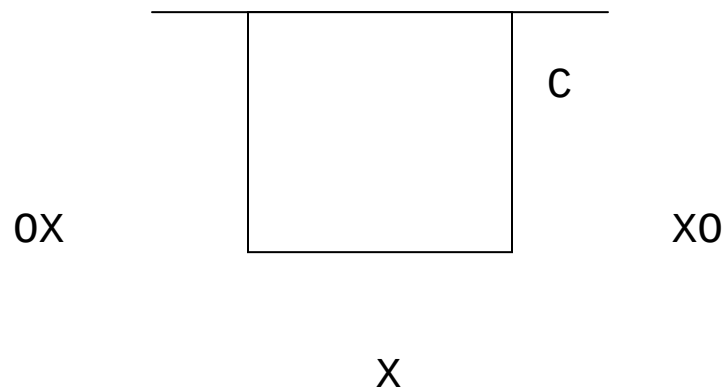

1. Principle based offense
  - a. Shot selection is huge
    - different for all players
  - b. Don't try to fit your players into an offense. Teach them to play offense.
  - c. They must learn to react instinctively
  - d. Freedom to read the defense
  - e. Win and lose together as a team – **WE**
  - f. Teach the kids to read the defense every day in practice.
2. 3 on 3 Perimeter Drill

- a. Defense is in total denial

- b. Catch and be strong in triple threat.
- c. Keep spacing on dribble penetration.
  - weak side guard stay in the vision of the dribbler on weak side penetration
- d. Catch and be ready to shoot.
- e. Set more back screens and back cut more against this defense.

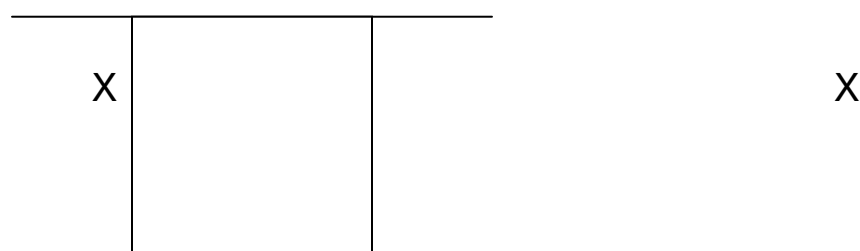

### 3. 3 on 3 Perimeter with a coach in the post

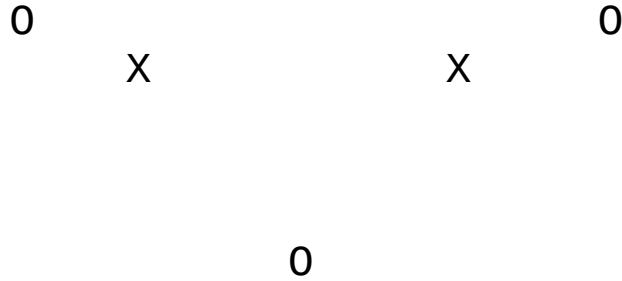

0

- a. Coach is a passer for the offense.  
Defense must react to pass in the post accordingly

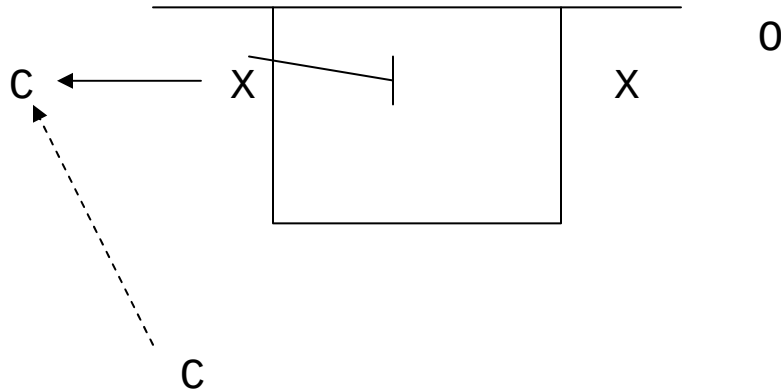

### 4. Box Drill (Perimeter)

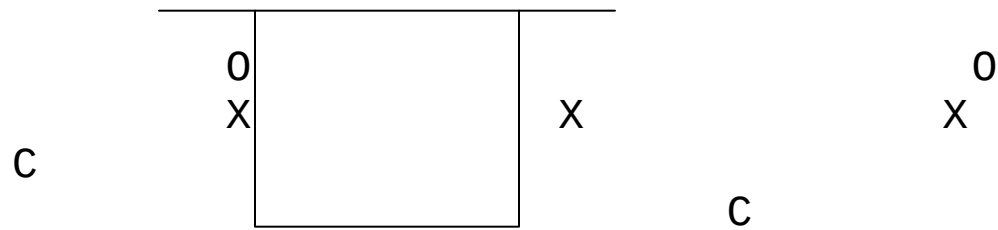

- a. Get into gaps
- b. Penetrate the gaps
  - Makes the defense react. Two will guard one which makes it hard to recover when you kick it out.
  - Shot Fake or Pass Fake on every catch.

## 5. Post Drill (Bottom Of the Zone)

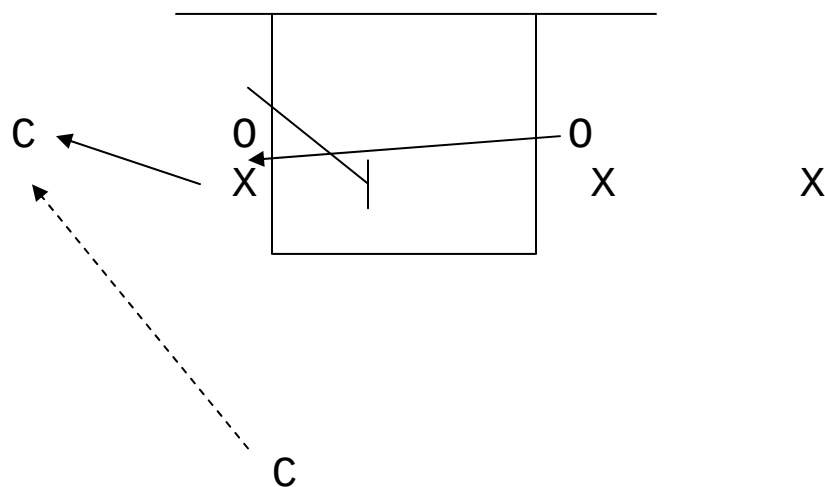

- a. Pass to the corner and seal in on middle defender
- b. Screen the zone first then seal in
- c. Seal out when ball is on top and seal in when ball goes to corner.
- d. Start on the weak side block and move to short corner on pass to corner.
  - Shoot or Power turn and lay-up.

## 6. 2 on 3 Bottom

C

- Seal in, seal out.
- Add the top flash when the ball goes weak side. Look high/low
- Flash high post. Move to short corner and dive.
- Pass the ball to the corner. Screen the center of the zone and cut to strong block. (Diagram Below)

## 7. Building Your Zone Motion

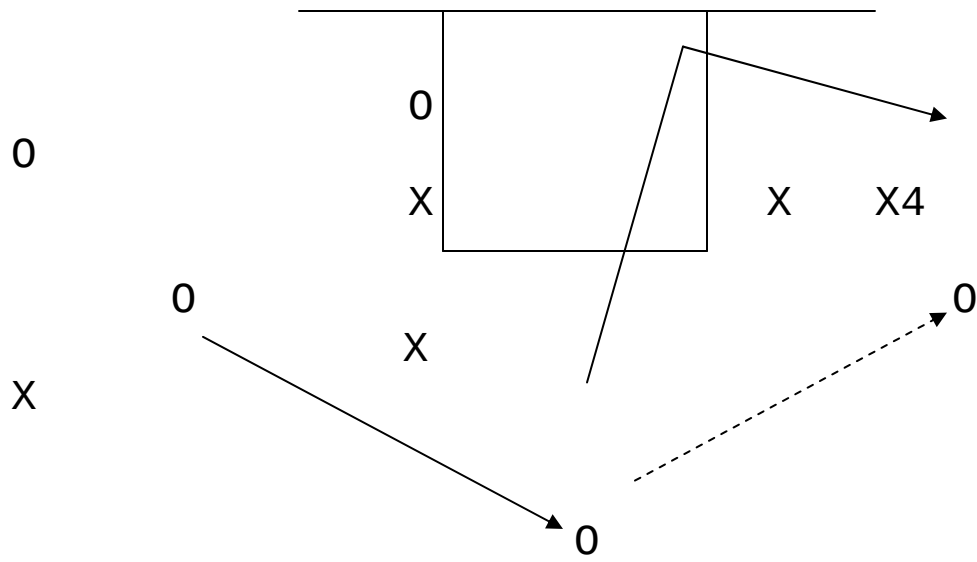

- Gap Attack

- Perimeter will attack the gaps but no cutting
- Post seal in and out. Can flash up to sweet spot and high post.
- Posts stay behind the zone. This pulls the bottom of the zone down and widens the middle to flash cuts.
- When you catch the ball in the post, look to the opposite wing as well. Wing must get in vision of passer and talk (Say Skip)
- After the post kicks it to the opposite wing, they could flash back to the ball and get it back.

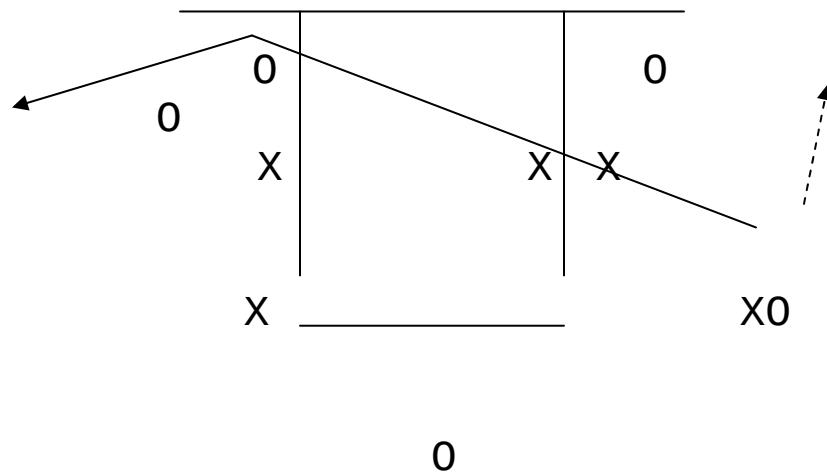

b. Quote - "When a team plays hard and thinks, it is a tough team to beat.

c. Gaps And Cutting Against The Zone

- Every pass the perimeter makes, they will cut through the zone. Look for the ball and empty out.
- Perimeter keep balance and spacing
- Post seal in when the ball goes to the corner
- A missed shot is not a mistake. Not taking a good shot for you is a mistake. Not crashing the boards on missed shots is a mistake
-

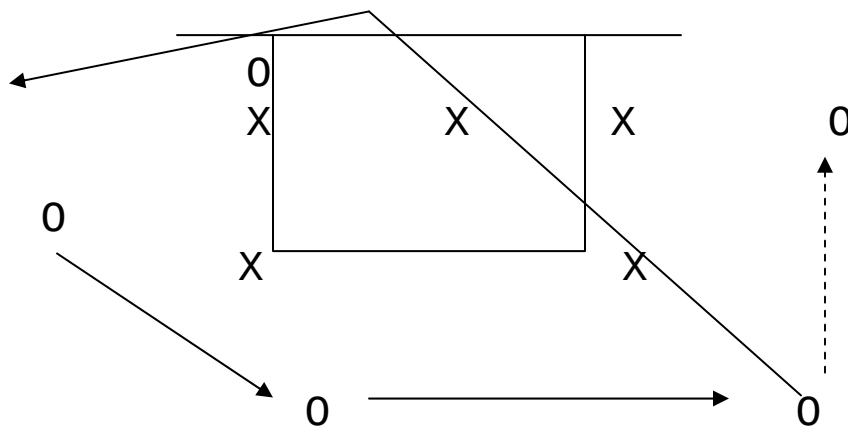

- This cut makes X4 have to make a decision on staying in or going out.

- If you have a good shooter, the defense will lose track of them if they move.
- c. Gap attack, cutting and screening
  - Ball screens
  - Flare screens
  - Pin the back side of the zone and skip
  - Screen the outside of the zone. Either the top or the bottom. After the big screens the top of the zone, they should roll to the sweet spot.

#### 8. 4 out 1 in Zone Motion

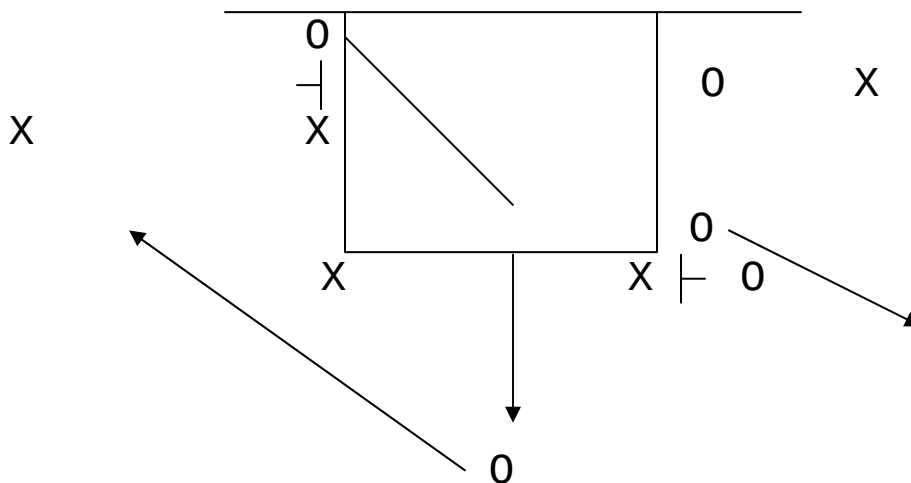

- a. Good to use if you have a big who can step out .
- b. Big can move in and out.
- c. Post stay on one side. Seal, screen and flash.

- d. Any pass to the corner, the passer cuts through and everyone fills up.

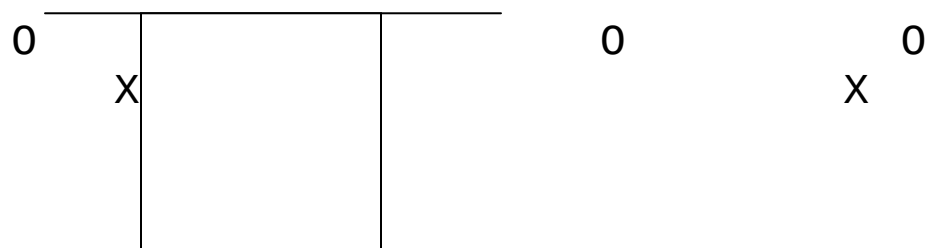

- e. When you reverse the ball a few times, the top of the zone gets used to moving east/west. Now is a good time to catch it on top and try to bust through the top two defenders with dribble penetration.
- f. Put a restriction on the number of post touches they must get until you can shoot a jump shot.

## 9. Distortion(High/Low Stacks vs Zone)

- a. High/low stacks into motion.
- dribble enter and loop.
  - Screen the zone

## 10. 1-2-2 Zone Attack

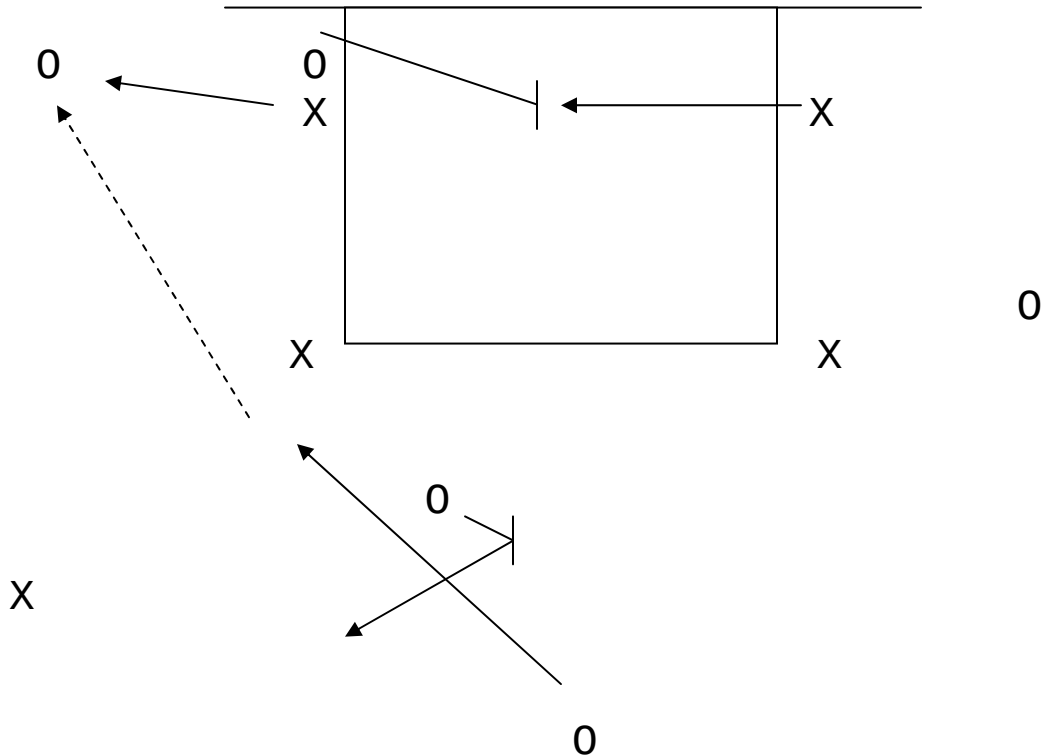

X

0

a.

- Get into gaps
- Corner person is best shooter and runner
- Bottom people screen the zone for the runner.

b. High screen vs 1-2-2

- Screen the top of the zone then pop.
- Pass to the corner or look for the pop person. If Pop person catches it, look high/low first then reverse the ball

- This set overloads the side to quick for the defense to handle.
